## WMS Warehouse Management Adjustments

### Adjustment In

Adjustment In allows a user to scan a location and then scan items as required one after the other.

There is a Goods Received mode and print labels option. On complete it will adjust the stock in to stock.

interprise suite™

Adjustment B1

Goods Rec User: Admin User Warehouse MAIN Print Labels By Location Goods Received Mode Complete Adjustment Cancel Adjustment

Picture	Item Name	Description	Unit Measure	Received Now
	17" Wheels			1
	17" Wheels		EACH	
No image	TP Batch			0
	TP Batch		EACH	

Reference:   
Reason:   
Location: A1  
Item Name: TP Batch  
UPC Code: B1  
TP Batch

Qty Receive: 0 EACH  
Scan Batch/Serial:

Batch and Serial items ask for the Batch or Serial. There is a LOCK option so a user can just scan batch or serials rather than the UPC then the batch or serial each time.

Adjustment B1

Goods Rec User: Admin User Warehouse MAIN Print Labels By Location Goods Received Mode Complete Adjustment Cancel Adjustment

Picture	Item Name	Description	Unit Measure	Received Now
No image	TP Batch			1
	TP Batch		EACH	

Batch/Serial No	Use By Date	Received Now
888	03/10/2025	1

Reference:   
Reason:   
Location: A1  
Item Name: TP Batch  
UPC Code: B1  
TP Batch

Batch/Serial: 888

Qty: Qty  
Qty Receive: 1 EACH  
Scan Item: (01)B1(10)889

There is also the option to scan GS1 QR Barcodes that contain the (01)UPC(21)Serial(10)Batch(17)ExpiryDate(30)Qty all in one go. The QR could just consist of the UPC and Batch etc.

## **Adjustment Out**

Adjustments out work like Adjustments In described above. However, the big difference is that it will not let you adjust out items that are allocated to sales orders.

EG if you have 10 in stock, 4 allocated to sales orders then you could adjust 6 out but if you try 7 it will say ""You can only take Free Stock i.e. not stock allocated to sales orders."

If the item is batch serial traceable and assigned to a sales order same thing.

This would check on individual scan and on save posting the whole adjustment in case any changes occurred afterwards.
