

ConnX Stock for interprise

Real-time warehouse control, powered by Interprise

ConnX Stock and Interprise work together to give you complete operational and financial visibility - from goods in, to production, to despatch and invoicing.

ConnX Stock is a powerful barcode-driven warehouse and stock management system, designed to integrate seamlessly with **Interprise**. Together, they eliminate manual processes, reduce errors, and give your business real-time insight into stock, orders, and costs - across every location. Whether you run a single warehouse or a complex multi-site operation, ConnX and Interprise form a tightly-linked solution that scales as your business grows.

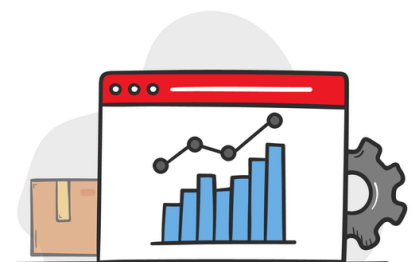

How ConnX and Interprise work together:

Interprise remains your core ERP and financial system - managing customers, suppliers, pricing, accounts, and reporting.

ConnX Stock enhances Interprise by taking control of all physical stock movement and warehouse activity.

The result:

- Stock movements captured once, at the point of scan
- Data updated instantly in Interprise
- No double-entry, spreadsheets, or delays
- Accurate stock, order, and cost information - always

Core ConnX Stock functionality (integrated with Interprise)

Barcode goods receipt & dispatch

Scan items as they arrive or leave the warehouse. ConnX updates stock levels immediately and posts transactions back into Interprise - ensuring stock, sales orders, and purchase orders are always aligned.

Benefit: Faster processing, fewer errors, real-time stock accuracy.

Real-time 360° stock visibility

View live stock by product, location, batch, serial number, or condition – across one or multiple sites – with data synchronised to Interprise.

Benefit: Confident decisions, fewer shortages, no surprises.

Multi-location stock management

Manage stock across multiple warehouses, bins, or locations, while Interprise maintains full financial control and valuation.

Benefit: Operational flexibility without financial complexity.

Adjustments, movements & traceability

Control internal stock movements, corrections, and adjustments with full audit trails. All activity is reflected in Interprise for accurate reporting and compliance.

Benefit: Complete accountability and stock confidence.

Mobile barcode stock take

Perform fast, accurate stock takes using mobile devices. Variances are highlighted and synchronised back to Interprise once approved.

Benefit: Dramatically reduced stock take time and disruption.

Searchable transaction history

Instantly trace every stock movement – who did it, when, where, and why – with full linkage to Interprise orders and documents.

Benefit: Faster investigations, stronger audit control.

Returns & credits processing

Handle customer returns and supplier credits efficiently, with stock and financial updates flowing cleanly between ConnX and Interprise.

Benefit: Accurate returns without admin overhead.

Built-in barcode generation & printing

Create and print compliant barcode labels directly from ConnX using Interprise product data.

Benefit: Consistent identification across your operation.

Why Interprise + ConnX is better together

Interprise delivers:

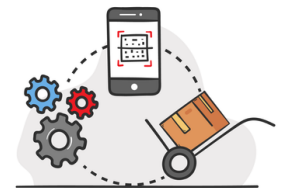

Strong financial and accounting control
Sales, purchasing, pricing, and reporting
Scalable ERP foundation for growing businesses

ConnX adds:

Barcode-driven warehouse execution
Real-time operational accuracy
Mobile workflows for warehouse teams

Together:

One version of the truth
Faster operations, fewer errors
Stock accuracy you can trust
A system that grows with your business

Modular, scalable, and future-proof

ConnX Stock integrates seamlessly into your Interprise environment and can be extended with additional modules as your needs evolve – including manufacturing and WIP tracking. You only add what you need, when you need it.

Implementation & support you can rely on

With over 25 years' experience delivering barcode and stock solutions, ConnX focuses on practical, real-world implementation - not just software.

- Remote or onsite implementation
- Test environments before go-live
- Unlimited support and training
- A team that understands warehouse reality

“Barcode solutions allow your business to grow, without increasing headcount.”
